THE ANGLO-CHINESE CALENDAR MANUAL.
 A Handbook of reference for the determination of Chinese Dates, during the period from 1860 to 1869; with comparative Tables of Annual and Monthly Designations, &c., &c. Compiled by WILLIAM FREDERICK MAYERS, H.M.C.S.
 Author's Preface.
 Most persons whose avocations or studies are connected even remotely with Chinese subjects are wont to confess the need of a convenient manual of reference for the purpose of determining dates according to either the European or the Chinese method of computation; and a system of comparison for the names attributed to years, months, and other periods is also frequently a desideratum with translators and readers of Chinese literature. The compiler of the following tables has thought accordingly, that their publication in a convenient form may prove useful, although much yet remains to be done for the elaboration of comparative calendars, etc. that should be nothing to be desired. With the exception of the Cyclical Table of Years, and the Table of Solar Terms, both of which were originally compiled by Dr. Morrison, and afterwards republished with improvements in Williams' Commercial Guide, from which (with some alterations) they are now copied, the whole of the matter assembled in the following pages is for the first time made accessible to general reference.
